

Community Collaborative Rain, Hail & Snow Network

**Southern** 

The word 'Southern' is written in a large, bold, black font with a yellow-orange glow. To its right is a colorful illustration of autumn harvest items, including pumpkins, gourds, and baskets of produce.

**New England**

The words 'New England' are written in a large, bold, black font with a yellow-orange glow, matching the style of the word 'Southern'.

**November 2021**

We started the new Water Year as wet as we ended the previous Water Year. Another month of above normal precipitation, and another October with an end-of-the month storm that affected many in eastern Massachusetts.

A warm month of October may not have us thinking about snow falling soon, but we should familiarize ourselves with snow fall and snow depth measuring and reporting.

Within this month's Newsletter: Have you seen your Water Year Summaries? Make a point about decimal points. Time to get ready for snow fall measuring and reporting.

We lead off, as we always do, with our version of "The Grand List"

Let's get into it.

## **The “Grand” List**

Congratulations to all of these observers from our three states who have recently passed a milestone of 1000 Daily Reports.

### **2000 Daily Reports**

MA-BA-51	Orleans 3.0 S
MA-WR-43	Leicester 2.4 ESE
CT-NL-6	New London 1.0 NNW
MA-MD-53	Acton 4.0 ENE
MA-FR-13	Conway 2.9 NW
MA-WR-41	Auburn 2.6 SW
CT-TL-18	Hebron 5.3 NW

### **1000 Daily Reports**

MA-BA-69	Eastham 0.9 SW
CT-FR-58	Ridgefield 3.6 N
MA-HS-21	Northampton 0.6 ESE

## **News Items**

**Water Year Summaries:** Did you get a chance to look at your Water Year Summaries? <https://wys.cocorahs.org> Pick a year. Pick a state. Pick a station. Dive into all of the tabs of a station. Scroll all the way to the bottom. Use the filters. Select the columns. Change the sort sequence by clicking on the column header. Pick Year 2022 and see what you have reported since October! All of this is interactive and dynamic now.

Within our three states: 683 stations submitted at least 1 report in Water Year 2021, spanning from Oct 2020 to Sep 2021, up 120 stations over the past 12 months.

149 stations (22%) covered 365 days. 250 stations (37%) covered more than 360 days. 372 stations (54%) covered more than 290 days. 174 stations (25%) are new to the crew. All of these %'s are stunning, a credit to your commitment to our network, and remain higher than the network average. 15% of the stations being new is a good break-even point and ours at 25% is much higher.

With more than 360 days covered, our highest precip total was CT-TL-27 Willington 2.7 SE with 76.26". 81 stations with more than 60" total precip. That's wet. 91.9" snowfall, and 75 days with snowfall, from MA-BE-21 Cheshire 0.5 NNW. MA-ES-4 Groveland 0.5 WSW with 108 days of snow on the ground.

**Password Changes:** Forget your password now, whether that coincides with a new mobile device, or a new web browser, and you will find that the change password process has changed now. Before, one email was sent with your login information. Now, that one email message sent will be a link to use to reset your password. All of this has been changed to avoid sending passwords in plain text within email messages.

## Observer Tips

### **Decimal points matter:**

Please look over and check ALL reported values before and after pressing "Submit". When snow arrives, there are more reported values and more chances to make a reporting mistake.

Repeating your reported value within a Comment is a good way to be doubly sure that you entered your amount correctly. Decimal point errors are sometimes subtle. Please be sure it does not happen to you.

**Snow Videos!** For seasoned observers and new observers alike, CoCoRaHS has a list of snow measuring [videos](#). Please watch these videos, familiarize yourself again with snow fall measuring and reporting.

**Snow Reporting:** Please avoid the most common mistake of snow reporting and that is: Reporting snow fall where your liquid precip value goes. Precip amount is ALWAYS first. Focus on the gauge catch. Find the liquid value of what falls in the outer cylinder and report that amount as your first value.

### **Significant Weather Reports:**

Our criteria:

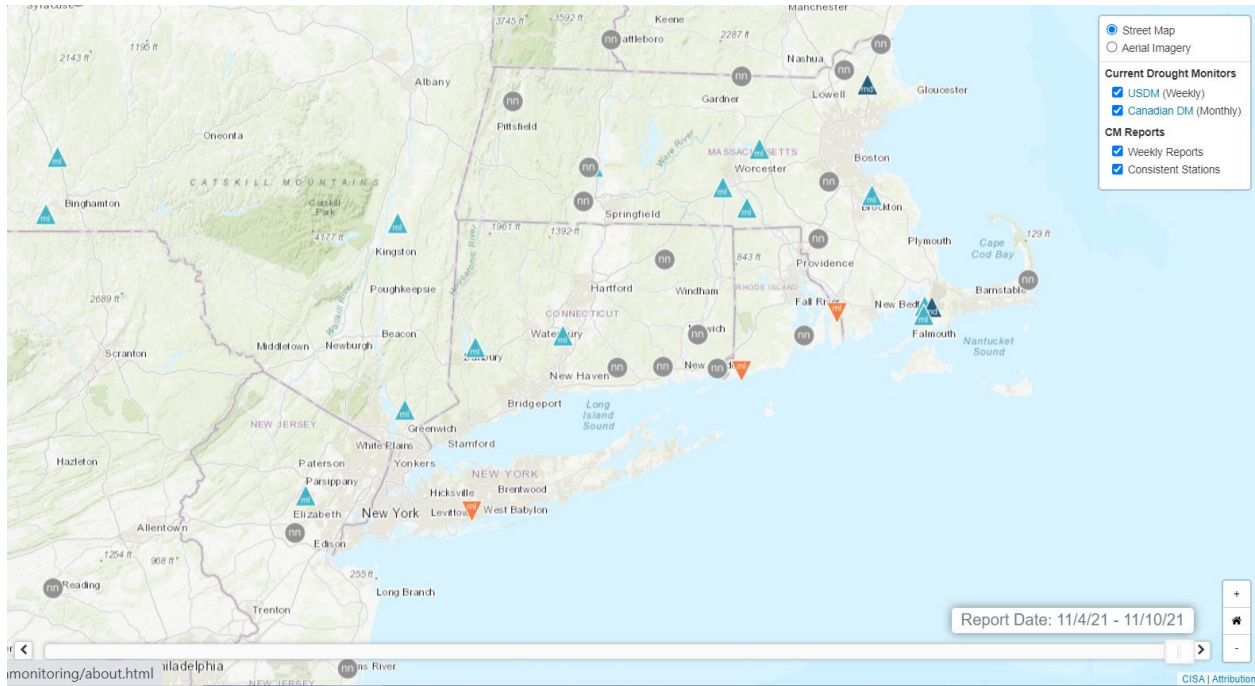

- **1" or more of rain or snow in 1 hour or less.**
- **2" or more of rain. Even when you measure 2" or more with your morning observation.**
- **3" of new snow fall.**
- **Change of precip type**
- **Snow total.**

- **Anything you feel is significant!**

**mPING app for Apple and Android:** Citizen Science in action. Use mPING to report rain, drizzle and dense fog. Get ready for snow coming.

## Condition Monitoring Reports

It's easy to pick out our locale on the national map. It's the area with so many reports clustered together!!! Thank you for this.

### Abington 1.2 NNE

Sun Nov 07 2021

Storm cleanup continues in some areas. We had our first night time lows below freezing this past week. Waterways are still above normal for this time of year. There are lots of lawns that are still quite green. Many trees still haven't dropped their leaves even after the storm last week!

MA-PL-15 -- General Awareness,Plants And Wildlife,Water Supply And Quality

### Jamestown 0.3 SSE

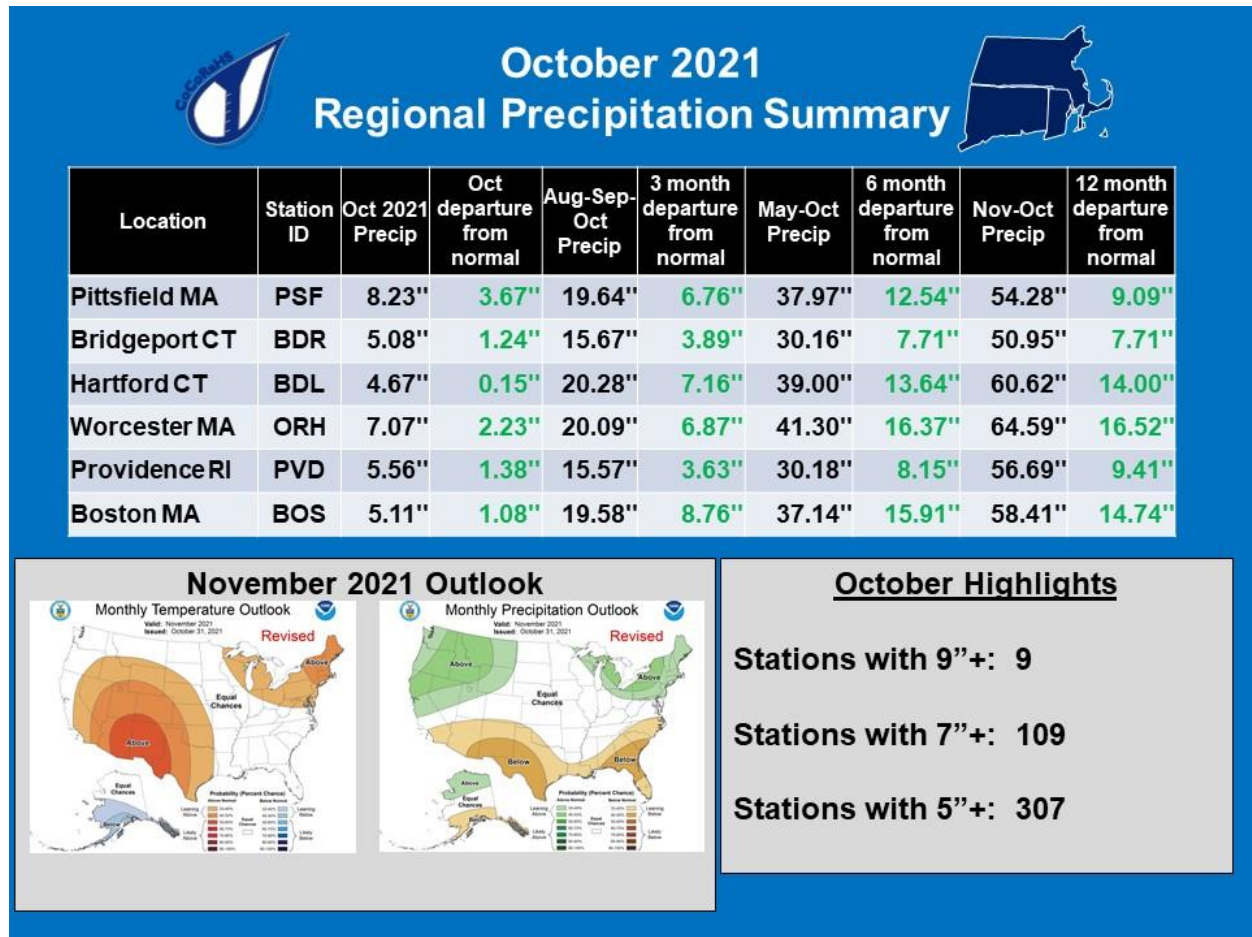

Wed Nov 10 2021

Conditions are still normal even with no rain for over a week. Lawn is still green but growing slower. With the low sun angle some parts of the lawn do not get any direct sunlight and are moist all day. Leaves are just starting to change.

RI-NW-18 -- General Awareness,Plants And Wildlife

# Detail and Summary for October 2021

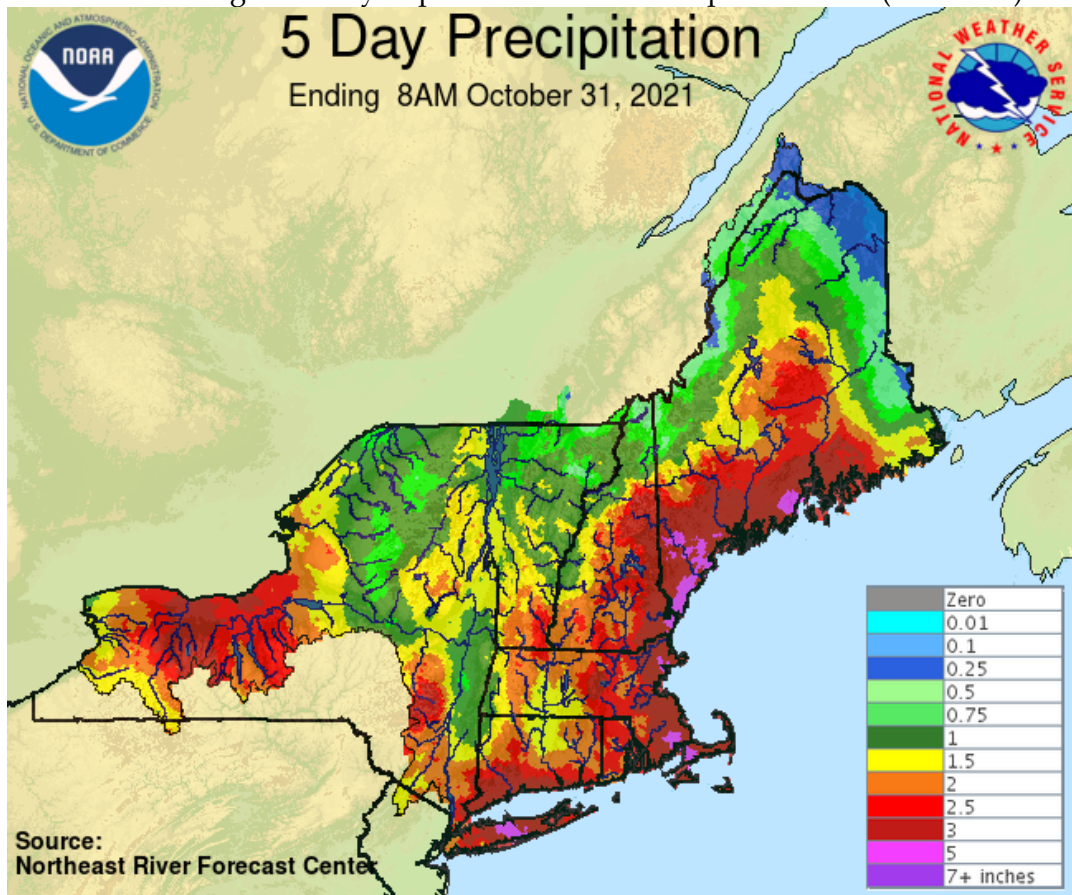

From the National Weather Service (NWS) Climate sites for Oct 2021.

Another wet month across the area. Striking to see the May-Oct values between 30"-41", compared to the 51"-65" for the Nov-Oct values. Subtract the two values and conclude that November – April was dry, May – Oct was wet.

## From your reports for October 2021

Observers reporting	561
Reported all 31 days	260
Completed by Multi-Day Reports	82
Missing 1 or 2 reports	88
Daily Reports	14,301
Zero Reports	8,193
Non-Zero Reports	6,108
Daily Comments	2,358
Multi-Day Reports	293
Condition Monitoring Reports	123
Significant Weather Reports	14
Hail Reports	0
Snowfall Reports	9,975
Snow Depth Reports	4,005
Total SWE Reports	2,634
Highest Daily Report	4.90" from Westport 2.5 ENE (CT-FR-20) on 10/27

Welcome to another 9 new members to this list from around the area, Wareham & Boston MA, Storrs & Harwinton CT... and more to add in Coventry RI. That makes 5 from Coventry RI on this list to go along with 2 from Coventry CT.

A surprise to find more Watersheds than last month. 96 out the 106 Watersheds in our area are in this month's list.

Cover all days in the month, no NA's for precip – even when it snows, no overlapping Multi-Day reports and your station can be listed here.

This list is sorted by Watershed which is explained further in this 5 minute [video](#).

Watershed	Watershed Name	Station Number	Station Name	Precip

October was another wet month. June was a dry month, and we've been wet ever since.

Pink colors are over 8". Pale blue over 6" The next shade of blue is over 5"

**“We do not live at the airport”**

An average of 5.77” of precip in this list for October. Our list of complete stations averaged 6.45”. Once again, the analog gauges capture more than the automated gauges.

Please use and report from the 4” diameter gauge all year round. Our network does not use automated gauges. And we do not live at the airport!

## **Rulers of the Snow**

We are the Rulers of the Snow. Nolan admires our catchy phrase. 😊

All of these rainy days do not stop us. We can do something that will define this climate: Report snow fall and snow depth for every day.

A list of 83 stations in October, plus a little extra from our friends, who reported snow fall and snow depth for all days.

Another month of measurable snow in Anchorage Alaska. Be ready to bring the inner cylinder and funnel indoors when cold weather arrives.

Using the mobile app? Look at the 2<sup>nd</sup> page of the mobile app, “More Details” on the Apple App, and fill in those snow values. Make a snow fall and snow depth measurement with every Daily Report, if you can safely do so, ***all year round.***

October 2021 as a calendar. Bright magenta for the highest number of reports. Green for the lowest number of reports.

461 Reports per Day was our reporting average for October 2021.

It's not a typical October here without an end-of-the-month storm.

Please continue to report the conditions where you are.

When it comes to assessing drought, having all of these CoCoRaHS observers leaves little doubt!

Strive to be a “Consistent Station” by submitting over 20 Condition Monitoring Reports in a 52-week period.

Every drop counts and zeros do too!

## U.S. Drought Monitor Northeast RFC

## **Wrap up**

Veterans Day was yesterday. Thank you to those members of our network who measure and report within our corps of volunteer observers with the same commitment, the same duty-bound determination as they did when they were part of our armed forces. Thank you for your service.

Thanksgiving is approaching too. A unique holiday, each year by presidential proclamation, a National Day of Thanksgiving, in which we pause to give thanks.

Thank you for your volunteer participation in our citizen science network. Rhode Island with more stations than all of southern New York. 96 out of 106 watersheds represented in this month's list. Record numbers of Significant Weather Reports. The stand-out cluster of Condition Monitoring Reports, week after week. Snow fall and snow depth reports in February, and the Rulers of the Snow reign supreme then and throughout the rest of the year. Thank you for all of that, and for braving storms with names and without names, power outages, and the swings of dry and wet conditions during these past 12 months.

Thank you for making our part of the network the growing success that it is.

The staff at Headquarters would like to express their thanks, at this time of the year, to the observers who reported from October 2020 to September 2021. Login in to your account on the website and access [My Account](#) . Towards the upper right, within your 2021 Water Year, click on the link for Certificate. That action will download a pdf file containing your Certificate of Appreciation, where you can view or print it. Please pass on your feedback about this Certificate to the team at Headquarters at [info@cocorahs.org](mailto:info@cocorahs.org)

Every one of our monthly newsletters concludes with a word of thanks and this season of Thanksgiving will conclude in the same way. Thank you for all that you do for CoCoRaHS, whether in the past, present and in the days to come.
