

Liz Page

Biography

Liz Page is a meteorologist at the University Corporation for Atmospheric Research's COMET Program in Boulder, Colorado. She has also worked for the National Weather Service and the Department of the Air Force in addition to lecturing part time at universities. Liz has worked in training development for weather forecasters for 25 years and has helped create several courses related to fire weather forecasting.

Liz has been fascinated with the effects of weather on wildfire spread since she was a kid growing up in southern California. The effects of Santa Ana winds on fire spread and the later mudslides that occurred during winter rains over the burn scars helped shape her doctorate research. Liz received her Bachelor of Science degree in Atmospheric Science from the University of California, Davis and her Master of Science and Doctor of Philosophy degrees in Atmospheric Science from Colorado State University in Fort Collins.
